

Dear FCC,I support both the ARRL's and the NCVEC's actions (RM-10867 & RM-10870) to bring Amateur Radio on even par with the technology of this time as well as the rest of the world. I think either one or a combination of the two would be the best hope for a strong and prosperous future for amateur radio. Especially in this day of unsure homeland security, we need a strong Amateur Radio and strong communicators to help should need arise.
